THE SEWARD SPECTRUM

Webster defines a spectrum as "a series of images formed when a beam of radiant energy is subject to dispersion and brought to focus so that the component waves are arranged in the order of their wave lengths."

Like the beam of radiant energy, we enter high school in an undefinable blaze of light. As we pass through the prism that is Seward Park High School we are dispersed in a glorious rainbow in which our diversity and individuality begin to manifest themselves.

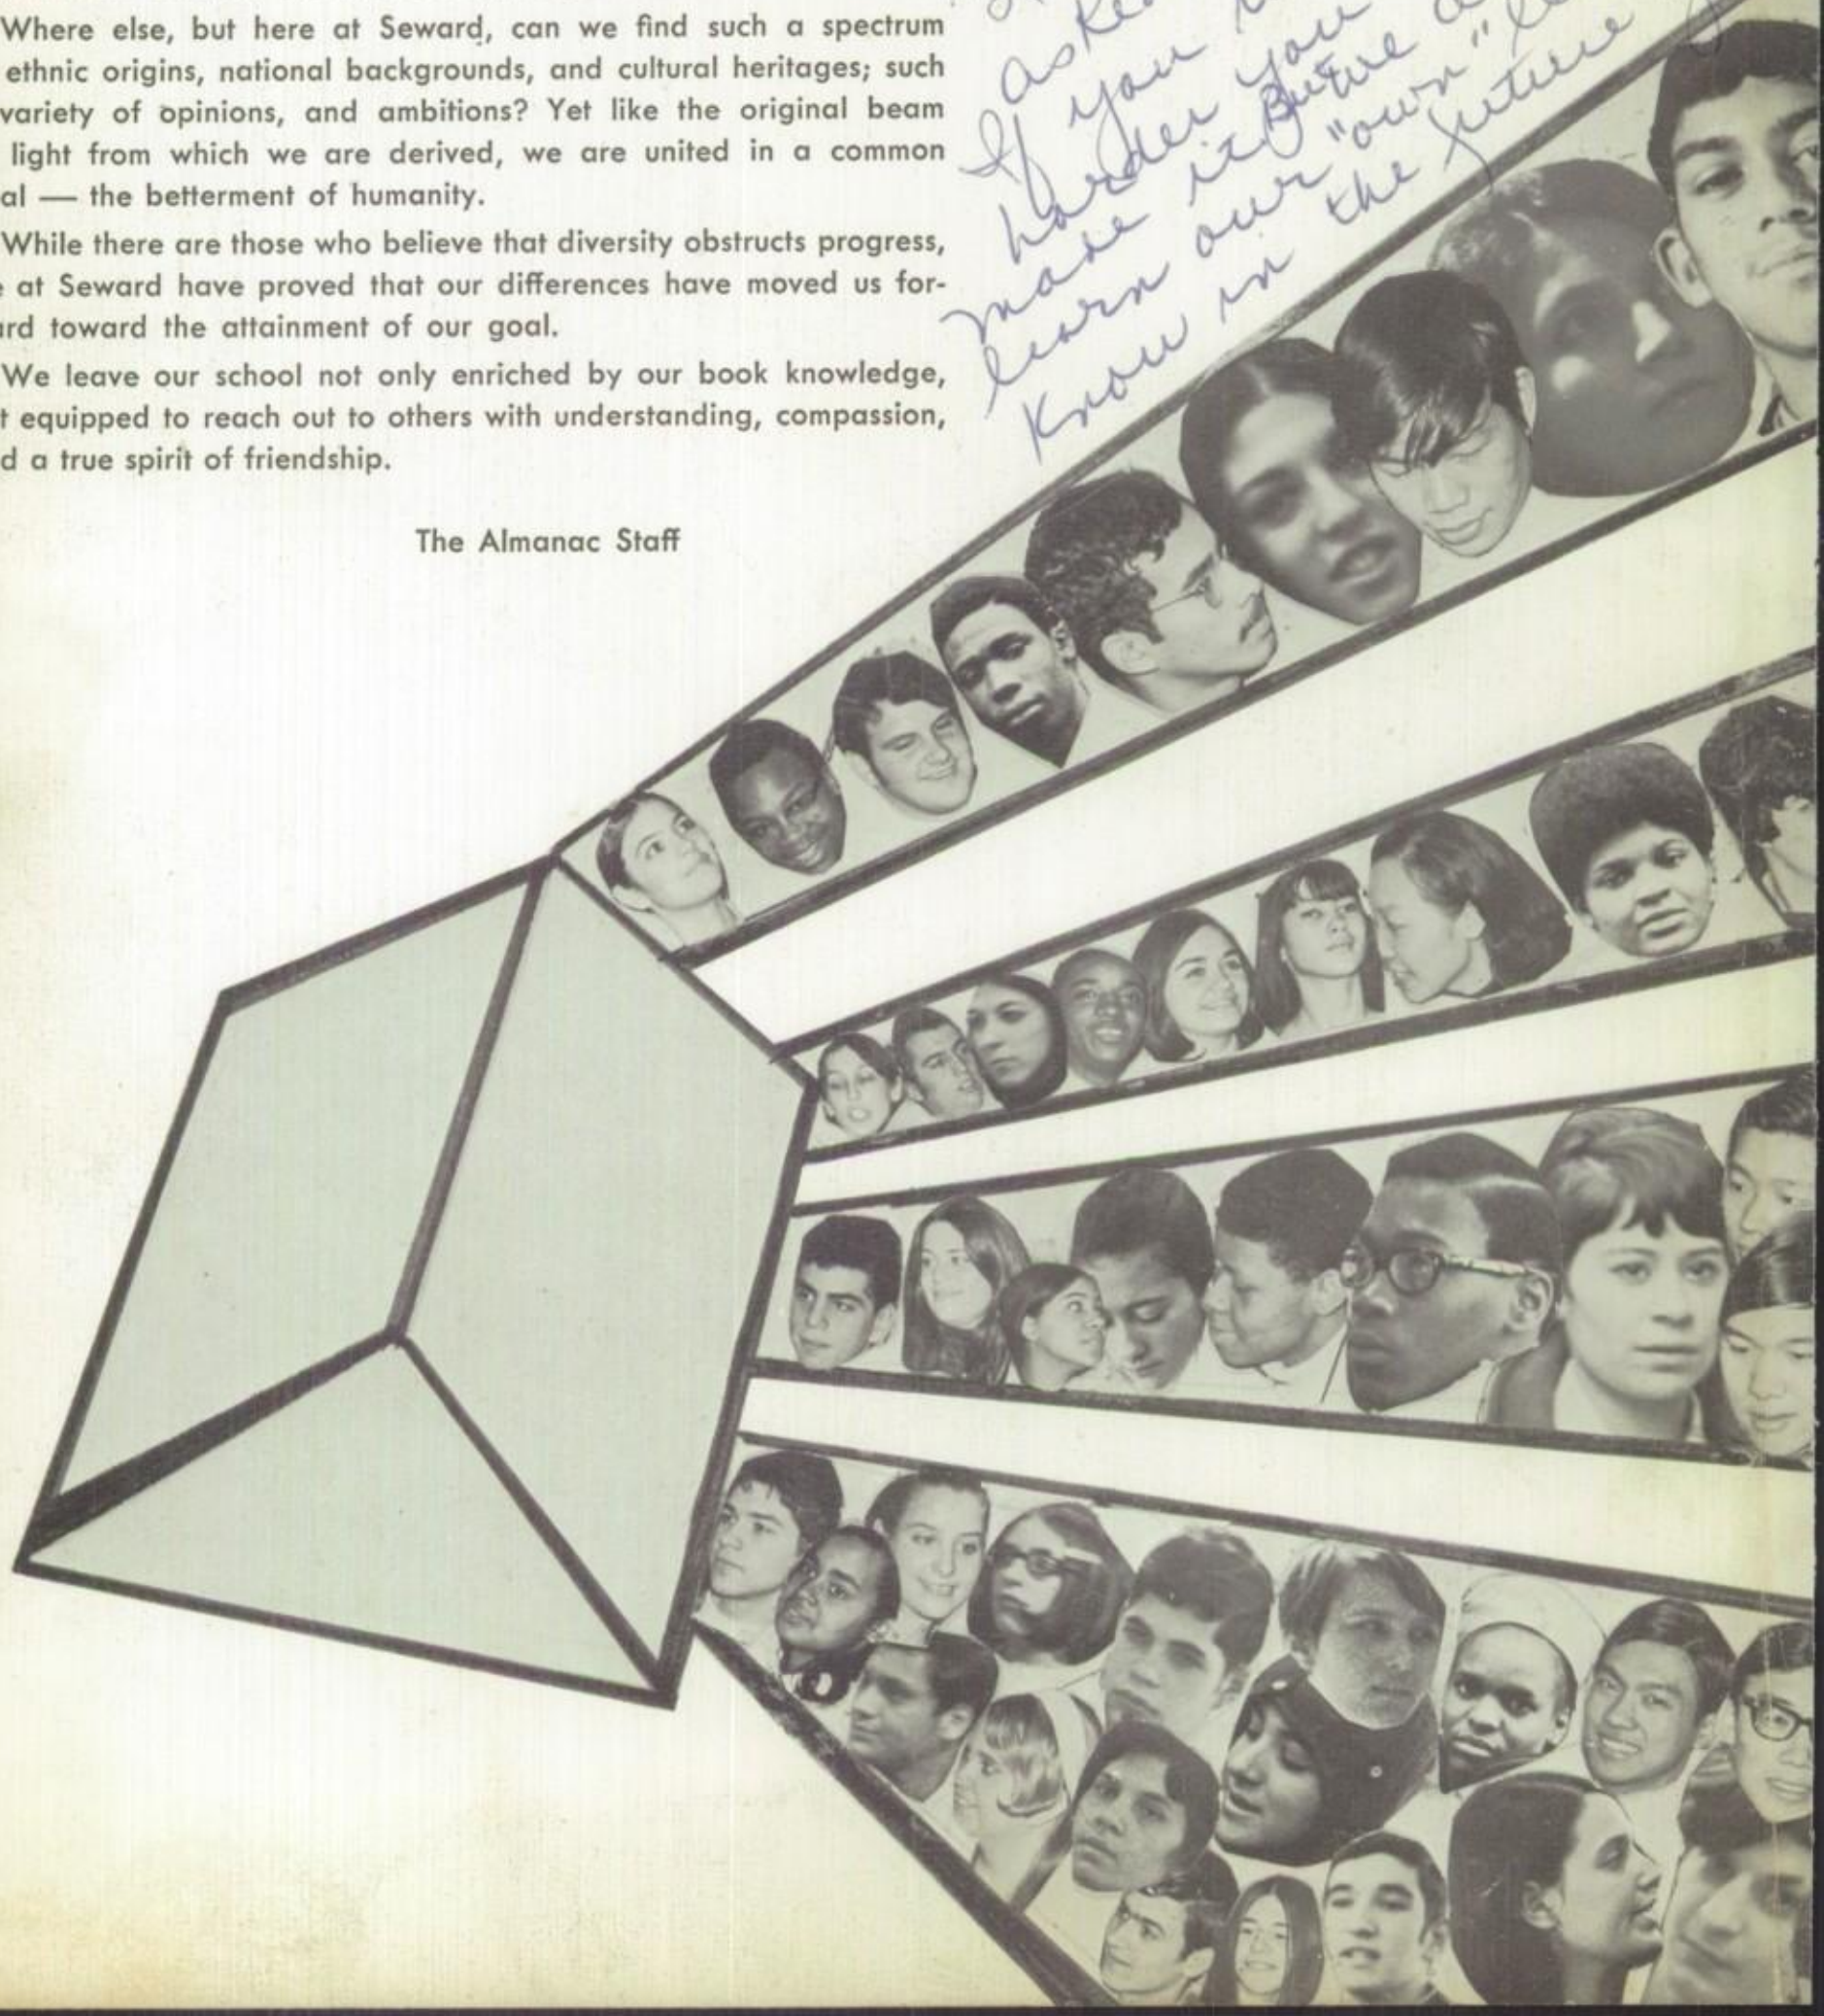

Where else, but here at Seward, can we find such a spectrum of ethnic origins, national backgrounds, and cultural heritages; such a variety of opinions, and ambitions? Yet like the original beam of light from which we are derived, we are united in a common goal — the betterment of humanity.

While there are those who believe that diversity obstructs progress, we at Seward have proved that our differences have moved us forward toward the attainment of our goal.

We leave our school not only enriched by our book knowledge, but equipped to reach out to others with understanding, compassion, and a true spirit of friendship.

Seward Invaded;

X PERIOD

It all started like this:

"Good morning, students and members of the faculty. This is Mr. Nanes, your principal. I wish to make the following announcement:

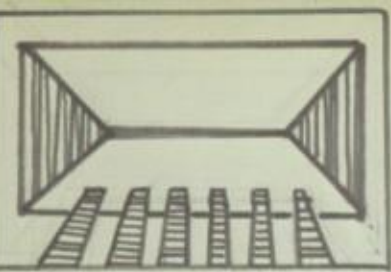

"As you know, due to circumstances beyond our control, the education of which you have been deprived must be made up — by you!!!

"Therefore, on the second Monday, after the following Tuesday, before the third Wednesday of the first of the month, we are initiating an *extra period* which we shall call X. Consequently, on every odd Tuesday, after every even Thursday, not to omit every fifth Wednesday, X period will equal 1.

"Henceforth and forever, until further notice, the X period will be rotated counter-clockwise, so that when the little hand is on the 6 and the big hand is on the 9, all seniors will be exempt from the X period, except if the X period starts with a vowel and ends with a consonant. However, after a legal holiday, such as Afghanistani Independence Day, and the Anniversary of the Coronation of the Archduke of Lichtenstein, X period will equal 9. In other words, you will now have to come to school earlier and stay longer.

"If you are not completely confused by now, please see your official teacher.

"This concludes today's broadcast."

IN THE LIMELIGHT

Dear Graduates:

In a sense, Seward is unique among schools, even of this urban center, in the ethnic diversity of its student body. Every race, every nationality, every creed is represented and each group brings to the atmosphere of the school a contribution to the education of all. To attend a school with such cultural diversity is an educational experience which many communities are seeking to attain. At Seward it comes naturally. It is to be hoped that through the experiences which you have enjoyed in school has come a deeper understanding of people. If you have achieved this, then it is a value which cannot be attained from books alone and which should survive throughout your adult life. Indeed, it is only as all people acquire this kind of understanding and appreciation that we shall be able to solve the conflicts that beset our times.

Sincerely,

A handwritten signature in cursive script, reading "Sidney Nanes". The signature is written in dark ink and is positioned below the word "Sincerely,".

Sidney Nanes
Principal

To initiate change requires courage; it requires restraint as well. It demands the commitment of the best energies of mind and heart, the concentration of every power of reason to foresee and direct outcomes even while we admit that change is always to a large extent unpredictable. As we strive, and it is the very essence of life that we do so strive, to expand the freedom of action, the power to dissent, or ease the restrictions or burdens upon any individual or group, it is critical that we anticipate a

painful stretching, an assumption of new obligations and awareness by society as a whole. No part of society can escape the increase in tension which change necessitates, nor can we shrink from acknowledging that the outcomes will not always reflect what we intend.

In the world of men, as in the world of the atom, the shift of an electron sets up reverberations which are often cataclysmic. With caution — since we cannot foretell, with courage born of faith in human compassion and reason, men can forge the changes which will assure to all children of earth peace and plenty and the chance to grow, changes which will, in Franklin Roosevelt's words, embody "those ideals which permit men to find common ground."
